

Timberline[®]
Luxurious Heat and Hot Water

Class B and Class C Application Guide

Timberline 1.0 & 2.0

Both Timberline versions share superior core features. Two-in-one systems, both heat and hot water.

- No sidewall penetration.
- Clean installation.
- Continuous hot water.
- Soft, quiet heat.
- Proven subzero performance.
- Low power consumption; less than 4.5 Amps DC heating and hot water.
- Easy-to-use touchscreen and RVC ready.

Timberline from Elwell

Elwell is a family-run company—big enough to support their customers, yet small and agile enough to respond quickly and efficiently to the support and development needs of their customers.

20+ builders have chosen Elwell to provide them with reliable heating systems and support, which has resulted in over 10,000 Timberline systems being installed and enjoyed all over North America.

1.0

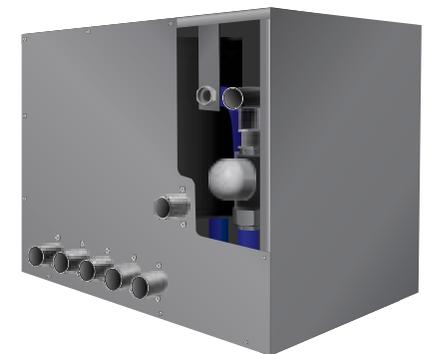

Modular Design

- Smallest market interior footprint.
- Single zone and single loop.
- Summer/winter operation.
- Gas or diesel application.
- Proven altitude performance over the last three years. Customers use our systems all over the country at all altitudes and weather.

2.0

All-in-one Design

- Two (2) heating loops and up to five (5) independent zones.
- Automatic summer/winter operation.
- Gas or diesel operation.
- 5kW or 10kW burner compatible; size the burner to the application. Both are available in gas or diesel.
- Proven high altitude reliability any where a customer can drive their RV in North America.
- Heating of floor and water holding tank made possible with touch panel integration.
- Cold weather protection certification.
- True four-season comfort.

The Timberline system has a dedicated service network across the country.
